Just before I call Mr Leung Wai Keung, the witness for Paul Y, could I just bring to your attention one or two matters that have happened since he filed his witness statement?

It is now known that Prosperity, the sub-subcontractor, delivered delivery notes to Golden Day, Paul Y's subcontractor, and those delivery notes stated that the materials, the solder, was lead-free.

It is also now known that in November 2015, an employer of Prosperity made a witness statement, and the witness statement says that the four invoices sent to Golden Day by Prosperity were for leaded solder.

Now, there is plainly a serious and material discrepancy between the two sets of documents, between Prosperity and Golden Day. Paul Y has anxiously, since it learnt of this, been seeking to obtain answers. We now know that Mr Yung Kwok Choi from Golden Day resigned from that company in August 2015, and we know that Mr Cheung Tat Yam, the other director, is separately represented from Mr Yung.

Now, I simply raise this as a preliminary scenario that will need, I imagine, to be explored, because on the face of it, there are significant and serious documents that are irreconcilable.

With that, I would now wish to call Mr Leung Wai Keung, with your permission. I will ask Mr Hui to take the burden of reading the statement.

R 主席:Yes.

DR McCOY:Thank you.

- I Background
 - 5. I graduated from England and have been involved in the building industry in Hong Kong for more than 30 years. I have managed more than 20 public housing projects including those of the Housing Authority ("HA/Housing Authority").
 - 6. I was the Project Director of PYGC for the Wing Cheong Estate project where PYGC was the main contractor. The Wing Cheong Estate project otherwise known as the Construction of Sai Chuen Road Housing Development, Contract No. 2009113 ("the Project") was a Housing Authority project. As a Project Director, my relevant responsibilities included the overall management of the Project, monitoring its performances and quality assurance. It is my personal practice to inspect project sites twice a week and spend half day on site on a daily basis attending to any project (including the Wing Cheong Estate project) that is close to completion to ensure its timely completion.

By a contract dated 25 October 2011 (Contract No. 20090113) ("Main Contract"), the HA engaged PYGC to Ν construct the Project. The Contract Manager was Chief Architect/2 of the Development and Construction 0 Division, Housing Department.

Around this time, the Licensed Plumber prepared, signed and passed to PYGC Part I and the Annex of Form WWO46 Е (see COI Bundle pp.14089-14095 which contains a complete set of Form WWO46 referred to below) in support F of an application for installing an inside service for the Project. PYGC then submitted the duly completed G Form to the Contract Manager for signature and onward submission to the Water Authority for approval. By Part Н II of Form WWO46 (see COI Bundle p.14090), and in December 2011, the HA endorsed the information Ι submitted by the Licensed Plumber and the Contract Manager under Part I. J
 - 18. Pursuant to the Main Contract, PYGC constructed for the Contract Manager's approval a sample floor to establish an acceptable benchmark for the material and workmanship required for the domestic blocks of the Project. PYGC was not aware of any inspection of the joints of the water pipes by the Contract Manager.
- 0 19. On 29 December 2011, the Water Authority gave its approval for the commencement of the installation work Р by issuing Part III of Form WWO46 (see COI Bundle **p.14091**) and thereupon Golden Day (for pipes & fittings) 0 and PYGC (for sanitary fittings) each instructed their respective suppliers to arrange for delivering of the R approved plumbing materials to site. Please see COI Bundle pp. 15306-15369 for the relevant purchase S orders, delivery notes and inspection records of the plumbing materials (not including the approved FRY Т lead-free solder).  - 20. Golden Day did not further sublet the Plumbing Works. Golden Day employed direct plumbing workers to carry out the Plumbing Works (see Golden Day's 12 September Declaration at COI Bundle pp. 15271-15274).
 - 21. Apart from the Licensed Plumber, Golden Day allocated a site project manager and a site foreman to supervise the Plumbing Works. Please see Golden Day's 12 September Declaration (COI Bundle pp. 15271-15274).
 - 22. As far as PYGC was concerned, it allocated a Building Services ("BS") Engineer, a Senior BS Coordinator and Foremen to provide on-site coordination and supervision for the Plumbing Works. - 24. The Contract Manager was responsible for conducting monthly Performance Assessment Scoring System (also known as the "PASS" assessments) on the completed portion of the Main Contract works, which included the Plumbing Works. For each monthly PASS assessment, the Contract Manager would randomly pick location from any unit of any completed floor for inspection (I understand that this was computer generated). A comprehensive inspection of the selected locations would then be carried out. A final PASS assessment would not be carried out until the Contract Manager's certification of practical completion for the Project.
- Κ 25. The PASS inspections/ assessments were conducted by the Project Architect together with the Project Clerk of L Works or with an independent PASS team of the Housing Authority in monthly rotation and with the attendance Μ of the representatives of PYGC. The Project Architect would inform PYGC of any non-compliant work identified Ν during the course of the PASS assessment and PYGC would deal with such non-compliant work very seriously as any 0 adverse score in the PASS inspections would affect its future tendering opportunity. Р
- Q 26. Please see Annexes 1.2(1) and 1.2(2) for the relevant extracts (i.e. Section 6) of the Plumbing Works section of the PASS Manuals for the interim (i.e. monthly) PASS assessment and final PASS assessment respectively. As can be seen from the Manuals, the scope of the inspection covered only the routing, alignment, compliance of materials and contamination protection etc. but not the soldering material. I understand the reasons to be as those set out in paragraphs 44 and 45 below.

- When the installation of the Plumbing Works was 27. approaching completion, representatives of PYGC (including myself, the project manager, the site agent and the BS Engineer) would have a meeting with the Licensed Plumber to review progress of the plumbing installation and the extent of the outstanding builder's works requiring inspection by the Water Services Department ("WSD") before the submission of Part IV ofWWO46 to the WSD.
- Upon the completion of the installation of the whole 28. water supply system, which was in or about June 2013, the Licensed Plumber issued Part IV of Form WWO46 (see COI Bundle p.14092) which PYGC in turn forwarded to the Κ Contract Manager for endorsement and requesting inspection by the Water Authority.
- An inspector from the Water Authority would then liaise Μ 29. with the Licensed Plumber for inspection of the Plumbing Ν Works. I understand that an inspection was carried out on or about 13 June 2013. The project team of PYGC did 0 not participate in the inspection by the Water Authority as advised by the Licensed Plumber. According to him, Р the inspector did not require the Main Contractor's attendance as PYGC had no role to play during the Q inspection. PYGC could only obtain the result of the inspection from the Licensed Plumber subsequently. No R irregularities were found during the WSD inspection.

PYGC was not privy to such communications and would only be informed of the same until the Licensed Plumber/Golden Day provided copies to PYGC for reference and retention. This was because for day-to-day communications, the Water Authority would only deal with the Licensed Plumber. fittings, including preparation and subsequent sample submissions to the Contract Manager's Representative for approval.

- 37. In respect of pipes & fittings, as the procurement of those materials fell within the scope of the Sub-Contract, Golden Day was responsible for preparing such sample submissions and would then pass them onto G PYGC for onward submission to the Contract Manager's Representative for approval. The AQCC of PYGC would Н first check the sample submissions received from Golden Day for compliance and then make an official submission to the Contract Manager's Representative for approval.
 - 38. As discussed above, sample submissions in particular, the soldering materials were approved by the Contract Manager's Representative.

Material control

Under the On-Site Delivery Verification Form 6210 39. issued by the Housing Department (Development & Construction Division) (please see Annex 2.1), PYGC is required to conduct "material check" and "document check" for materials specified under Form 6210 and/or as specified in the Main Contract upon the delivery of the materials on site. AQCC of PYGC would check the materials and submit the written records of the materials for checking by the Contract Manager's Representative. Copper pipes & fittings and soldering materials do not fall within the materials to be checked in the Form 6210 regime as specified under Form 6210 and/or in the Main Contract and as such, these materials would not be subject to the above checking procedure.

- 40. In addition, in order to ensure the quality of the Main Contract works and as a requirement under Specification Preliminaries PRE.B9.620P to PRE.B9.690.P of the Main Contract, PYGC had in place a Project Quality Plan for the Project which had been submitted to the Project Architect for comment and received no adverse comments from him. Please see **COI Bundle pp.15113-15226** for the approved Project Quality Plan.
- 41. Section 7.2 of the Project Quality Plan concerns Н material control. It was stated that all materials shall be procured upon approval and delivered as per Ι delivery schedule. The storekeeper and the AQCC of PYGC were responsible for preliminary receiving inspection J upon delivery and arranging storage and transportation of materials to working area. PYGC's Project Engineer Κ and Quality Control Manager were responsible for testing to materials whenever required. All L substandard products had to be rectified before installation and erection (see sections 7.2.1-7.2.2). Μ According to the flowchart to Appendix B to the Project Quality Plan, upon the delivery of the materials on site, Ν the materials would be checked against the Site Materials Requisition Form and Delivery Note. Upon 0 passing the visual inspection by the storekeeper, the materials would be transported to storage or awaiting Р for testing when required.
 - 42. As far as I am aware, as PYGC directly procured the sanitary fittings for the Project, the materials so delivered were inspected and transported to storage and tested (if required) in accordance with Section 7.2 of the Project Quality Plan stated above. I refer to paragraph 19 above.

- 43. As for the pipes & fittings and 小五金 for the Plumbing Works, they were procured by Golden Day and PYGC would only undertake a high-level supervisory role in the manner described in paragraphs 45 and 46 below and would rely on the specialist plumbing sub-contractor for compliance with the Waterworks Regulation for achieving the passing of the final inspection and the water sample test conducted by the Water Authority.
- 44. As soldering materials (as a component of 小五金) were Н generally perceived as a relatively minor item of material for the Plumbing Works, never did such an item Ι of material, in my years of contracting experience in the Hong Kong construction industry occur to me (or J anyone in a similar capacity) to be one demanding scrutiny particularly where there is no testing Κ requirement stipulated in the Contract. Since the L "lead water" incident, PYGC sought the relevant delivery notes (COI Bundle pp. 14635 - 14666) of the Μ soldering materials from Golden Day. As shown from the delivery notes, Golden Day did obtain supplies of Ν soldering materials specified in the Contract Specification (i.e. lead-free solder) which were 0 delivered to site. It is evident from those delivery notes that a total of 360 rolls of FRY lead-free solder Р was delivered to site.

45. As mentioned above, as the Plumbing Works were sub-contracted to Golden Day, a specialist plumbing sub-contractor, PYGC undertook merely a high-level supervisory role overseeing and monitoring the works carried out by Golden Day. Plumbing Works carried out by Golden Day. The site foremen, BS Engineer, a BS coordinator and a general foreman inspected the Plumbing Works on a daily basis. During their inspection, they would mainly focus on checking whether pipelines were properly routed and aligned. They would not place particular focus on the pipe joints considering that if joints had been installed properly it would ultimately be revealed by the water test and the locations of leakage would become known. For the reasons mentioned in paragraph 44 above, no one would have paid particular attention to the solder. It was also unusual for there to be inspection of the actual soldering works because until recently no one was aware of the risk of the presence of lead in the solder or its associated health risks. And further, some of the jointing works were carried out on the external wall of the building to which access could only be made by gondola.

- 46. As to both the Project Manager and myself, we had an overall duty of supervision of the Main Contract works (including the Plumbing Works) and would attend to any problems as they occurred.
- 47. During the monthly and final PASS assessments mentioned in my response to Question 1 above, the Plumbing Works were only subject to random check and inspection by the Contract Manager. For each of these interim (i.e. monthly) and final PASS assessments, representatives from PYGC would attend the inspections with HA. Should there be any issue of non-compliance concerning the Plumbing Works identified during such assessments, PYGC would immediately notify Golden Day for rectification work (e.g. alignment of pipes).

- As mentioned in my response to Question 1 above, as per the PASS Manuals for the interim (i.e. monthly) assessments and final assessment, soldering materials did not form part of the assessment and therefore would not be subject to random inspection by the Contract Manager during the course of the Project, or indeed any other HA projects in which I had personal involvement in my past 30 years of experience.
 - 49. Upon completion of the plumbing installation, PYGC would organise a meeting with the Licensed Plumber to review any outstanding builder's works that might affect the Water Authority's inspection and urge the Licensed Plumber to arrange Part IV of WWO46 for submission to the Water Authority.

Supervision of work & Inspection

- 54. As mentioned in my response to Question 1 above, Golden Day assigned a project manager, a site foreman to supervise its workers on site.
- Golden Day had a full time foreman on site to carry out 55. Κ day to day inspection of the Plumbing Works in particular whether those Works were carried out in accordance with L the approved drawings. His duties and responsibilities also included arranging workers to carry out work, Μ attending site meetings, placing orders for and delivery of materials, following-up of progress of Ν works and preparation for water test. Golden Day's project manager would regularly visit the site when 0 required to attend site meetings or when problems occurred on site which required his attention. Р

It is a requirement under section 15 of the Waterworks Ordinance (Cap 102) ("Waterworks Ordinance") that no inside service shall be constructed, installed, maintained, altered, repaired or removed by a person other than a licensed plumber or a public officer authorized by the Water Authority.  57. As I also mentioned above, the Licensed Plumber for the Project was Cheung Tak Yam who is also the owner of Golden Day. Golden Day's 12 September Declaration sets out the duties and responsibilities of the Licensed Plumber
 G which included regular site inspection, submissions of the various WWO46 Forms and making arrangements for water testing.

Supervision of work & Inspection

58. I understand from PYGC site staff that the Licensed Plumber (both in his capacity as the owner of Golden Day and as the Licensed Plumber of the Project) did at regular intervals visit site and inspect the installation of the Plumbing Works during the course of the Project. However, no written report of such inspections is available from Golden Day.

HA

Inspection

59. As mentioned above, HA conducted monthly PASS assessments (and final PASS assessment after the issue of the Certificate of Completion under the Main Contract). The Plumbing Works were only subject to random checks and inspection by the Contract Manager and representatives of HA. For each of these monthly and final PASS assessments, representatives from PYGC attended the inspections with HA. As soldering materials were not included in the PASS Manuals for monthly assessments and final assessment, soldering materials were not part of the assessment and were therefore not subject to inspection by the HA during

the Wing Cheong Estate project. Certificate of completion 60. Upon the Contract Manager's satisfaction that the Main Contract works were substantially completed, on 12 July 2013, the Architect issued the Certificate of Substantial Completion for the Main Contract works. 61. Thereafter, during the period from 22 August to 10 September 2013, the final PASS assessment was conducted and the results were satisfactory. WSD Installation 62. - 65. After the Water Authority inspection, no defect list in the form of Form WWO1008 was issued to the Licensed Plumber and the Licensed Plumber reported the same to PYGC. As I have mentioned above, PYGC and the Housing Authority were not privy to the inspection.
- 66. The Licensed Plumber then arranged cleansing and disinfection to the plumbing system for the Water Authority to take water samples from the installed plumbing system for submission to the Water Authority. The Water Authority did not require the Licensed Plumber to take any other water samples for accredited laboratory test for the Project.
- 67. After the satisfactory results of the water samples, the Water Authority by Part V of Form WWO46 certified 0 that no irregularities were found and approved the Р plumbing detailed in Part IV of Form WWO46 i.e. the whole water supply system. The Water Authority issued the 0 Certificate Regarding Water Supply Connection (see COI Bundle p. 14139) for the development to the HA and the R Licensed Plumber. <u>Q4 - Explain the measures, supervisory, monitoring and</u> <u>quality control system in place by PYGC in order</u> <u>to comply with such Contractual Requirements and</u> to ensure the safety and quality of drinking water.

- I should say at the outset that PYGC, just as other main 75. contractors, would formulate (or adapt) a quality control plan according to the client's requirements as set out in the contract. The client's requirements in this regard are usually expressed via "specification" and "testing". HA/HD is no different and in its Paper submitted to the LegCo dated 22 July 2015 (COI Bundle p. 37568) it stated, "We exercise quality control on water supply systems in public housing estates through specification and testing." For HA contracts, the HA determines what tests are to be required and by Conditions of Contract, the Main Contractor shall carry out and allow in its tender the costs of any specified tests (see Clause 42(1) and (2)) and will be reimbursed as variation works if the Main Contractor shall be instructed to carry out any additional tests (see Clause 42(3)) and compensated for any delay and disruption costs (see Clauses 50(b) (vii) and 63(c)) unless non-compliance is shown. Therefore, the level of supervision and inspection set out in PYGC's quality plan depends, to a large extent, on the importance and risks attached to the item of material (or workmanship) in question by HA/HD as expressed via their Specification and Testing requirements.
 - 76. As I mentioned in my response to Question 2 above, PYGC subcontracted the Plumbing Works under the Main Contract to Golden Day, a specialist plumbing sub-contractor. PYGC undertook primarily a supervisory role overseeing and monitoring the works carried out by Golden Day. PYGC also relied on the water sample test carried out by WSD which results were

- 77. To ensure that the plumbing materials would comply with the requirements under the Main Contract, provisions had been included in the Sub-Contract that the requirements under the Main Contract documents, including the Main Contract Specifications, shall apply to the Sub-Contract. See paragraphs 73 and 74 above.
- 78. As mentioned in my response to Question 2 above, PYGC duly prepared a Project Quality Plan for the Project (which was submitted to the Project Architect and he made no adverse comment thereon) according to the specification and testing requirements of the HA as set out in the Contract as part of PYGC's effort to ensure the quality and compliance of the Main Contract works. In terms of non-statutory requirements, PYGC was D requested by the HA to make sample submissions to the Contract Manager's Representative for approval in Е respect of the plumbing materials in Housing Department's Sample Submission and Approval Form. mechanical compression joints method is at Clause С PLU.M130.5 under the "Pipes, Fittings and Joints" section - for "(f) meter assembly branch and pipework D up to 54mm, (g) meter outlet and consumer piping up to 32mm, and (h) consumer hot water piping (15mm / 22mm)". Е In this regard, I note from paragraph 63 of the witness statement of Ada Fung, the Deputy Director of Housing F (Development and Construction) of the Housing Department, dated 29 October 2015 and produced in this G Inquiry that the HA had the expectation that solder jointing would in general be used - "Currently, for Н copper pipe installation, soldering is specified in PLUl for pipe connection while mechanical compression Ι joint is allowed to be used on technical need basis, such as the pipe connection to valves or when soldering J joint is not practicable due to site constraints." My Κ understanding is that save as locations where compression joints were to be used on technical need L basis, soldered joints were to be used for jointing copper pipes. Μ

- 88. My perceived advantage of jointing the copper pipes by soldering is that it is more secured if installed The term "mechanical joints" include properly. different jointing methods. Please explain and identify the D Deviated Plumbing Materials and also, to the best of your Client's knowledge, why the Deviated Е Plumbing Materials were allowed to be used without being spotted during the supervisory and monitoring processes. This request is F confined to Deviated Plumbing Materials which have now been found to contain lead or from which lead has leached into water. G Н 90. The Plumbing Materials used which allegedly deviated from the list of Plumbing Materials submitted to the Ι Water Authority are items (3), (4) and (6) of the plumbing materials (all being mixers) for which sample J submissions had been submitted and approved as listed in Schedule 1. Κ L 91. The reason for the deviation was that after the list of plumbing materials had been submitted to and approved Μ by the Water Authority (as attached to Form WWO46 Part I), the Project Architect requested PYGC to make Ν alternative proposals for the relevant plumbing materials after the inspection of the sample floor. 0 Р 92. The alternative mixers submitted to an approved by the Housing Authority are contained in COI Bundle pp. 14267-Q 14270, 14271-14274, 14278 -14299. PYGC then ordered and had the mixers delivered to site for work. R S 93. As mentioned in my response to Question 2 above, with a view to properly supervise the Plumbing Works carried out by Golden Day, PYGC allocated a project manager, a site agent, site foremen, a BS Engineer, a BS coordinator and an AQCC to the site for supervision of the same. The site foremen, BS Engineer, a BS coordinator and a general foreman inspected the Plumbing Works on a daily basis.
 - 99. I also refer to references to the checking of materials as per Form 6210 in paragraph 39 in my response to Question 2 above. Copper pipes & fittings and soldering materials do not fall within the materials to be checked in the Form 6210 regime as specified under Form 6210 and/or in the Main Contract.
 - 100. As can be seen above, as a general building contractor, our supervisory measures and system focused on compliance with the contractual requirements and regulations and so far as the specialist plumbing installation is concerned, PYGC to a large extent relied the expertise of the specialist plumbing on sub-contractor and the Licensed Plumber. In respect of ensuring that the plumbing materials were lead-free and that the drinking water would be lead-free and safe, PYGC relied on the aforesaid statutory regime and the HA testing regime, water test results and approval

<u>Q12 - Given your answers to the matters in the preceding</u> paragraphs, explain to the best of PYGC's knowledge how Plumbing Materials containing lead came to be used in Wing Cheong Estate and also why the use of the same had been allowed and overlooked

- 105. There has been no further contact with Golden Day since receiving Lo & Lo's 16 October letter. The answers below are limited to the knowledge and information available to PYGC without further reference to or from Golden Day since that day:
- (1) On hindsight, there was over-reliance on the Licensed Plumber and Golden Day as a specialist plumbing contractor. The provisions of the Waterworks Ordinance and the Waterworks Regulations are all directed at the Licenced Plumber and the Customer (for which the Authorized Person acts as his statutory agent) and, as such, PYGC relied heavily on the Licenced Plumber for compliance with these statutory provisions and requirements applicable to the Project. I believe that PYGC's such reliance was in accordance with is industry's practice. Ιt the quite understandable that the licensed plumber of a building project is the only person authorised to handle and sign all necessary documents and liaise with the Water Authority and WSD on the contractor's side and the AP is in a like position on the customer's side. All comments and feedbacks from the Water Authority are addressed to the licensed plumber and all site inspections and testing by the Water Authority are to be attended to by the licensed plumber in the absence of the general contractor. As a result, the general contractor

can only simply follow the licensed plumber's stand, performance and advices on the plumbing installation and rely heavily upon them to obtain Water Authority's final approval of water supply for the projects.

- F (2) As discussed above, PYGC subcontracted the plumbing works to Golden Day, the owner of which is a G qualified licensed plumber and he was accordingly also appointed as the Licensed Plumber for this Н Project. By the same token, the procurement of copper pipes and fittings and the lead free solder materials were done by Golden Day to achieve a better control on wastage.
- Κ (3) As a result of PYGC's internal analysis, it does not appear to be a probable cause that the substandard solder materials found their way into the copper pipe joints as a result of the execution Μ by Golden Day of the remedial works during desoldering/re-soldering. Ν
 - (4) Further enquires with Golden Day subsequent to the "lead water" incident since PYGC's Preliminary Report dated 29 August 2015 to the HA (COI Bundle pp.15903-15103) did not elicit any or any credible explanation as to how the sub-standard solder materials came to be used in the copper joints.
 - (5) For the reasons stated above, to this date the other causes set out in PYGC's Preliminary Report remain only as possibilities but far from any certainty.

107. Further, PYGC have provided one NSF53 certified water filter (being a domestic water filter from England; model: HIP/ULTRCARB CM12) together with filter cartridge replacements for the coming two years for each domestic unit in the Estate.

Permanent Measures

- 108. PYGC has recently agreed with the HA to replace all affected pipeworks, as necessary, as the permanent measure for remedying the excess lead in drinking water.
- 109. The plan is to replace the vertical down pipes (if they J are confirmed to be contaminated) by Tectite copper Push-fit stainless steel pipes and fittings system from Κ the roof downwards. The Tectite system adopts Push-fit technique for jointing pipes which will enable the L plumbers to re-joint the newly installed copper pipes This method is Μ without using solder materials. believed to bring disruption of water supply to Ν residents of the affected units in the Estate to the absolute minimum. After the replacement of all vertical 0 down pipes (if they are confirmed to be contaminated), PYGC will replace the copper pipes and joints located Р at the corridors (if they are also found to be contaminated) with Push-fit fittings.
 - 110. The WSD has approved the above plan and work is expected to commence shortly, initially in the common areas such as the corridors following which water samples will be taken by the HA/WSD to determine the quality of the drinking water and whether it is necessary to replace the pipeworks within the domestic units and, if so, its extent.

B С Recommendations for the future D 111. To avoid similar incident from re-occurring in the future, PYGC would recommend the following measures to Е be taken:-F (1) The training institutions (such as Vocational G Training Council) ensure that Licenced Plumbers and Plumbing Workers are sufficiently trained to be Η "lead- free" conscious and taught of the health risks of contaminating the drinking water the use Ι of non lead-free solder will give rise to. J (2) I agree with the recommendation of the Interim K Report of the HA Review Committee to continue the practice of using non-soldered joints such as L compression joint (at paragraph 12). Μ (3) Where soldering joints are used, HD revises its relevant specification provisions making solder Ν materials as PLU2 category, i.e. mandatory testing. 0 (4) HD requires water samples to include lead and heavy Р metals as testing parameters. Q (5) The main contractor devices an inspection and R testing regime according to HD**'**s revised specification and testing requirements. More S specifically, the Main Contractor will check all soldering materials by XRF analysers before they Т are released for use on site. All unused lead-free soldering materials should be required to be U

| (FOR TUNG WUI ESTATE) 7. The Project involved amongst others the construction of two non-standard domestic blocks (Block 1 with 34 to 37 storeys and Block 2 with 28 to 33 storeys). Golden Day Engineering Company Limited ("Golden Day") was engaged by PYGC as its specialist plumbing sub-contractor to carry out the supply and installation of the water supply system. 許佐賓先生: Paragraphs 8 to 18 are substantially the same. I will read from paragraph 19. 19. On 19 July 2010, the Water Authority then gave its approval for the commencement of the installation work by issuing Part I1 of Form WW046 (see COI Bundle p.21269) and thereupon Golden Day (for pipes & fittings) and PYGC (for sanitary fittings) each instructed their respective suppliers to arrange for delivering of the approved plumbing materials to site. Please see COI Bundle pp. 22550-22622 for the relevant purchase orders, delivery notes and inspection records of the plumbing materials (not including the approved FRY lead-free solder). There are however no purchase orders for the FRY lead-free solder because, as I understand it from Golden Day, these orders were made casually over the phone. Further, and as stated in Golden Day's 12 September Declaration, as the Sub-Contract had been completed for more than 3 years, Golden Day no longer retains the relevant delivery notes of the FRY lead-free solder. 問:喺你咁多年嘅工作經驗裏面,咁你知道需要用無鉛焊料呢樣嘢,咁其 中一個原因都係鉛對人體有害呢樣嘢,你都知道嘅? 答:我知道鉛有畫。 問: 係。咁要用呢個無鉛嘅焊料做食水喉,咁主要嘅原因都係因為怕如果 用咗有鉛嘅焊料可能進入咗食水喉入面,就會污染咗嗰啲食水,即係 呢樣嘢,你同唔同意? 答:我有深入去研究嘅,即係喺而家我當然知喇。 問:即係從常識嚟講,你都會同意嘅,係咪? 答:係。 問: 係。我想睇一睇你嘅證人口供第 332 頁。即係都係講緊榮昌邨嘅, 而 家。332頁,第68段嗰度。 答:係。 問:咁呢度你就話喺嗰啲 tender documents,即係嗰個主合同嘅 tender documents, 同埋嗰啲 subcontracts 入面,都搵唔到任何一啲特 定嘅條款,就係關於話「啊,你要確保呢個食水呢係要 lead-free, 即係無鉛嘅,同埋係安全嘅」。你亦都話搵唔到有任何特定嘅條款就 話係要警惕,可能會嗰啲鉛係走咗入去食水,嗰個咁嘅風險咁樣。呢 度你係咁講喇。但係以你咁多年嘅經驗同埋你對用無鉛焊料呢樣嘢嘅 認知,咁你都會同意我咁嘅講法,係咪呢?就係話即係你作為一個 Technical Director,即係個承建商嘅 Technical Director, 咁你都唔會容許例如甲大廈建造完成之後, 嗰啲食水係會含有重金屬 或者係唔安全,你都唔會容許有呢樣嘢發生嘅。 答:如果我知道,我係唔容許嘅。 問:即係就算合同搵唔搵到話有一個特定嘅條款都好,即係有有咁樣畫公 仔書出腸都好,咁呢樣嘢都唔容許㗎,係咪? 答:如果我知,我係唔容許。

| D | 答: | 其實係咁嘅,就因為我哋公司係有一個 approved list 嘅,係 subcontractor 嘅 approved list。咁喺嗰度,我哋嘅 |

- 問: 係咪? 咁就喺報價嘅時候,一般嚟講,我哋講緊如果係外判商,同你 哋 報 價 嘅,咁 佢 哋 會 唔 會 話 同 你 哋 交 代 下,例 如 喺 個 specifications 入面,如果有提及過嘅一啲物料,例如佢哋會即 係覺得嗰個估計嗰個價錢係幾多,會唔會咁同你講?定係話佢哋報一 個總數畀你?即係例如可能係每個單位幾多錢,又或者成個 project 幾多錢,咁樣。
 - 答:對唔住,detail 方面就我唔能夠太肯定,但係應該唔會係報每個單 位嘅;應該係有--我哋係畀番 BQ,即係有 breakdown 畀佢哋落嘅。 不過我呢個我唔能夠太肯定。
- 問:係。即係你講嘅"BQ"都係講緊你哋嘅主合同...
 - 答:呢度。
 - 問:...入面嘅 BQ 入面有嘅嘢?
 - 答:係,冇錯。
 - 問:咁如果主合同入面,BQ 冇提及嘅一啲物料,咁你哋--即係喺報價嘅 過程之中,你哋點樣去到釐訂例如佢畀你嘅價係即係公唔公道、合唔 合理咁呢?
 - 答: 其實呢個工程大--其實直至--我哋判--我哋通常都係 back-to-back,即係背對背嘅工程,咁其實我哋根據BQ同房署--即 係負責個--即係要佢項目--嗰數--items或者項目,咁其實判頭都 係攞番嗰個 scope 嚟落標嘅,所以變咗冇乜有 conflicts 會出。
 - 問:係。我唔係講緊個--即係講緊個 conflict 嘅問題。即係我係講緊話, 如果你哋睇 BQ,咁 BQ 入面可能有一個系列,就係講咗有啲咩嘢物料, 咁就即係...
 - 答:其實唔係呀。係 BQ 係會係--譬如喉,幾多--每1 mete 係幾多錢,...
 - 問:係,冇錯。
 - 答:...掣,每1 mete 係幾多錢。咁但係又--因為個 SMM,即係喺建築 嚟講,佢度數有佢哋嘅守則嘅。舉例,有乜--有某程度嘅大嘅喉,佢 就係包--唔包括配件,即係嗰個 joint 嗰個位係唔包,冇得度,再 度開嘅--即係可以度開嘅。但係如果係有啲細喉就冇得度開嘅。咁 其--呢啲係 QS 嗰方面佢哋會--即係同埋水喉匠佢哋都明白,會一路

- 落呢--用呢啲方法去計算嘅。
- 問:係。即係我就想知道就係話有一啲喺--例如喺個 BQ 嗰度冇特別係講 到明嘅,即係你話係有得度開嘅,即係一啲嘅即係物料,咁可能喺水 喉工程入面都要用嘅,但係 BQ 嗰度就冇提及過嘅,咁喺嗰啲咁樣嘅 物料嚟講,你哋點樣去到釐訂例如個外判商畀你哋嘅報價係咪合理咁 樣,你哋會從啲乜嘢嚟作一個根據呢?
 - 答:因為喺 building 嘅 QS 裏面佢有一個叫做 preamble,咁佢哋就會 講呢個每一個單價裏面係包咗乜嘢嘅全部嘅材料或者係要求嘅,所以 變咗其實佢落個單價嘅時候,佢係好充分知道嗰個--譬如舉例,頭先 講嗰個嘅細喉,佢係有啲配件唔可以度開嘅,譬如,咁佢就要知道, 啊,原來呢條喉每1 mete 幾多錢係包埋個配件嘅,好清晰咁樣寫咗 出嚟嘅。
 - 問:係,我知道。咁但係你喺睇佢嗰個即係--即係個報價嘅時候,即係你 哋點樣去諗,話「啊,呢個報價係咪合理呢?我應唔應該接受你呢個 報價呢?貴咗吖,定係點呢?」即係你哋會點樣睇呢?
 - 答: QS 佢係落價嘅時候佢哋係有一個呀市場嘅價錢嘅,佢哋好清--即係 佢哋好--喺--好清楚可以睇到,譬如呢1 mete,譬如係細喉,佢要 包配件咁,咁呢個價錢係咪合理地去包到呢個配件係喺度。
 - 問:我哋而家睇一睇你個證人口供第73段,都係講緊榮昌邨嘅。73頁就 講到嗰個即係外判合同嘅。咁外判合同,呢度你都講出咗就係話即係 其中有一個條款就係話--因為你啱啱都提過 back-to-back 喇,咁 就係話你哋就將嗰個例如保華佢本身喺個主合同入面,咁你哋對房委 會嘅責任呀,咩嘢呢,都係需要呢個--你哋嘅外判商都要同樣地負上 呢啲責任嘅。

答:係。

- 問: 係咪? 如果我哋睇一睇嗰個有關嘅條款嗰個用字係咁樣, 377頁。377 頁入面都講咗, 就係話喺個--呢個合約個 preamble, 我哋叫做, 即 係喺個簽名上面, 睇到嗰個「承判商」嗰度嘛?
- 答:睇到。
- 問:「承判商對本工程之一切合約文件之所有條款、有關總合約之一切條 款同埋資料,以及承判商所負之一切責任同埋義務,在簽約前已經詳 細研究同埋完全明瞭,並已到地盤就係實地磡察,確保所落之單價正

問:梁生,跟住落嚟就想同你討論一下就係就住嗰啲物料嘅樣辦提交畀房 署或者房委會嗰方面嗰啲問題。我哋之前同其他啲發展商都有傾過就 係就住水喉潔具物料--承建商嗰個就住水喉物料同埋潔具係分--即 係我哋睇到嗰個總合同--個主合同都會分 PLU1 同 PLU2 嘅,呢個你 都清楚嘅,咁就主要有關水喉嘅部件,我哋都可以喺 PLU1 嗰度搵到 嘅,一啲潔具嘅即係材料,通常我哋就喺 PLU2 嗰度睇到嘅,呢個你 清楚嘅?

答:清楚。

- 問:我亦都知道就係 PLU1 嚟講,除咗某幾項即係例外嘅情況以外,就喺 一般嚟講,都只需要係呈交有關嗰個物料嘅即係文件,就唔需要話真 係呈交嗰個物料嗰個樣辦嘅,呢樣你都清楚㗎嘛?
- 答:其實喺 sample submission 嗰度,我有同事係負責嘅。
 - 問:係,我知道。
- 答:我其實唔係好太清楚 PLU1 係唔需要入辦呢個。
- 問:明白。我哋咁講,即係如果我哋淨係睇話例如而家呢個焊料嗰個情況 嚟講,即係焊料我哋知道就係唔需要--即係根據個總合同--主合同就 係唔需要就係提交嗰個樣辦畀房署係作呢個審批嘅,呢樣你知道嘛?

- - 問:即係你哋就作過調查?
 - 答:係。
 - 問:但係就唔清楚究竟係邊一方面,即係自己先引發呢樣嘢,即係或者提 出咗呢個咁樣嘅呈交嘅步驟?
 - 答:係,但係就喺紀錄上面,就保華喺第一個 sample submission schedule 裏面係冇呢個焊料嘅 items,所以好--因為呢個 schedule就係保華我啲同事做嘅,所以可以理解就係保華唔係第一 個人...
 - 問:好,我哋不如睇一睇你喺你證人口供入面所呈交嗰個 schedule 1 嗰度入面啲部件同埋材料,G1 嘅 348 頁,我哋見到 348,即係我抽 幾個例子出嚟同你討論一下,唔使逐個逐個講嘅,348 嗰度,例如第 (1)、第(2),我哋講緊啲 ductile iron pipe and fitting 嗰 啲,嗰啲係我查過,都係 PLU1 嘅即係系列入面嘅一啲材料嚟嘅。

答:材料。

問:另外就係(2)都係 PLU1 嘅,即係啲 brazing rod、jointing copper pipes 呢啲都係 PLU1,即係話唔需要即係真係攞個實物嘅樣辦出嚟 嘅,另外就例如(7)同埋(8) 嗰啲都係,然後我哋一路睇,其中有啲 都係嘅,例如(12) 嗰啲 flanges 嗰啲都係屬於 PLU1 嘅,以我所知。 跟住就去到(16),就係個 wire FRY 嘅 lead-free solder 嗰個 同埋個松香膏,就係個 Power flux (Powerflow flux?),咁即 係你哋意思就係話你哋查番啲紀錄,就係你哋第一次去呈交嘅時候就 方包括到呢個 FRY 呢隻物料嘅,係咪呀?

問: 呢個應該係及後你哋再加番上去呈交,即係附加上去,再作一個呈交, 然後就得出嚟,總結咗就有呢幾隻物料,就係一共係呈交咗畀房署 嘅,係咪呀?

答:係。

- 問:我想問下, 喺就住呢次事件嘅調查過程之中, 都有冇問過你哋啲同事, 因為你話你自己就唔係直接負責呈交嗰個樣辦, 有冇問過一啲相關嘅 同事, 因為我見到例如嗰個呈交樣辦嗰個表格即係畀房署就應該係你 哋呢個 AQCC 嘅同事嘅, 有冇同佢哋作過一啲理解, 就係話究竟當時 點樣去選擇邊啲物料作呈交啲樣辦嘅, 有冇作過理解?
 - 答: 曾經有同佢哋詢問過嘅, 佢哋就話當需要入辦嘅時候, 佢哋就會通知 金日嘅 PM, 就話畀佢聽「你要準備你所負責嗰部分嘅材料。」佢哋就 會做咗成個 sample board, 即係其實啲水喉都有做 sample board 嘅, 佢將啲喉安喺塊木板度嘅, 咁就拎晒嚟, 之後佢哋對過晒, 咁佢 就 submit。
 - 問:或者我哋一步一步嚟,你剛才講就係話如果你覺得係有需要攞啲樣辦 嚟作呈交嘅,咁你會通知金日就叫佢作準備喇?
- 答:其實我哋係通知金曰「你負責」--即係佢因為喺我哋嘅分判合約裏面 佢係負責水喉嗰部分嘅材料,我哋就話畀佢聽「而家要入 sample submission,就唔該你準備個 sample 喇。」咁所以其實我哋冇好 specific 講畀佢聽「你要準備銅喉」咩嘢嘅,我叫佢全部一齊準備。
 - 問: 係全部一齊準備, 係咪呀?

答:係。

- 問:我想知,首先就係就住呢個焊料,需要呈交樣辦呢件事,即係有咁嘅 需要,你哋覺得係要做呢樣嘢,你有冇問過例如 AQCC 嘅同事話「當 時係邊個決定話連呢個焊料都要作個呈交嘅?」有冇問過呢樣嘢?
- 答:我有問過,但係就攞唔到一個好確實嘅答案。
- 問: 冇一個確實嘅答案?
- **U** 答:係。

- 主席:乜嘢意思呀?冇一個好確實嘅答案?
- 答:因為佢哋話唔知道當時係--因為有一個同事就記得話好似係房屋署要 求,但係亦有 AQCC 就覺得好似係金日自己遞過嚟嘅,所以變咗我就 喺呢個聽證會度就唔能夠講一個好確實嘅答案。
 - 主席:得。無論係兩者裏面邊一者都好,都唔係你哋保華自己話要交乜嘢 焊料同埋邊一隻焊料上去嘅?
 - 答:係。
 - 問:如果我咁樣講啱唔啱呢,就係話我哋見到呢一度你個 schedule 1 嗰度就有十七種物料,其中有啲我剛才都同你討論過,就係有啲係 PLU1 嘅物料,你同唔同意咁樣講法呢,就係就住 PLU1 嘅物料,雖 然合同上係方話到需要你呈交嗰個實物--樣辦個實物嘅,不過你當時 就住呢幾種 PLU1 嘅物料都作咗呈交,你覺唔覺得係即係其實保華都 覺得呢幾種物料係有呈交嘅需要,即係呈交樣辦嘅需要呢?
 - 答: 我深信我哋保華冇考慮呢樣嘢,就房屋署--即係金日 make submission 嘅時候,我哋就 pass 過去。

 - 答:係。
 - 問:例如我哋啱啱咁講,就係話喺個合同--主合同入面,雖然冇話要求你 哋呈交個實物樣辦,即係就住焊料嚟講,但係你哋呈交咗,呢個做法 你覺唔覺得都係即係進一步可以即係確實咗其實選擇咗邊一樣、邊一 隻牌子嘅邊一個即係 model 或者邊一個系列咁樣嘅,咁就確認咗呢樣 嘢,咁樣等以後你哋大批去購買嘅時候就唔會有任何誤解,大家即係 都好清楚知道要去買邊一隻物料,同意嘛?
 - 答:同意嘅。
- 問:另外就住呢個合同入面個訂明都有講到嘅,即係有啲 preliminary 嗰度都有講到嘅,我唔揭開大家睇,就係話其中一個話需要呈交呢啲

- C 咁嘅實物樣辦嘅一個原因都係話希望就有呢個實物樣辦畀咗房署,房 署批核咗,keep 咗喺度,等日後真係啲大批料嚟嘅時候,如果要作
 D 比較嘅,可以攞番出嚟作比較,你同意係呢一個係其中一個原因嘛?
 - 答:我想理解下比較係指保華去比較吖,定係房署去比較?
 - 問:即係如果係就你嚟講,即係如果係我哋講緊個主合同嚟講,如果係房 署佢需要去作一個比較嘅,你覺得即係咁樣係一個原因嘛?
 - 答:係方便咗佢去做比較。
 - 問:保華佢都係咪需要作一個比較呢?即係如果你知道要呢隻料嘅,而你 亦都係承擔咗個責任嚟到提供呢隻料嘅,你哋係咪都需要作一個比較 呢?
 - 答:其實 sample submission,我哋都有 keep 紀錄嘅,咁我哋會係可 以做 cross reference。

問:即係你都同意嘅?

- 答:就無需要係即係一定要攞到房屋署嗰個愛嚟做比較。
- 問: 係喇, 即係如果佢批咗嘅, 在你哋嚟講, 都可以有個比較嘅作用, 同 意嘛?
- 答:係,冇錯。
 - 問:講番你剛才提到嗰一點,就係話攞呢啲咁嘅樣辦,我哋而家都係仍然 喺度講緊焊料,即係唔講其他嘢住,焊料嗰個樣辦,你呈交畀房署之 前,應該係有你哋公司嘅同事先會同金日工程公司嘅職員去講話「你 哋要呈交樣辦喇。」係咪咁樣嘅程序?
- 答:我頭先都重複--我再重複,因為我哋係叫金日去準備個 sample submission,就係呢個 in general 佢所有嘅佢負責嘅材料,就冇 特別咁講明「你要入呢個焊料或者係入呢個喉管」。
- 問:就住你話 general 嘅呢個材料或者一啲部件,佢需要作樣辦嘅呈交 嘅,你哋會唔會同佢講話,叫佢喺就住某一隻材料或者係部件,要攞 邊一隻牌子,你哋會唔會同佢講?

- 76 -

問:我就想問下,你當時去就住--你話去問你啲同事,包括 site agent、 building engineer,佢哋就有同你講過就話「有通知 Golden Day 嘅。」咁?

答:係。

問: 佢哋講咗呢啲之後,但係又搵唔到文件,你有冇考慮過--即係你畀口 供之前,有冇考慮過都叫你呢啲咁嘅同事畀口供,就住呢方面去作 供,有冇考慮過呢樣嘢?

答:我有考慮。

- 問:好。另外我想問下,就係你話啲同事話畀你聽就有通知過 Golden Day 就係啲物料就批咗,嗰個樣辦批咗,我想知道就係批咗之後,直至到 去到即係現場施工嘅時候,我哋講現場施工嘅時候比較準確啲,現場 施工嘅時候或者施工之前,有有一啲 briefing sessions,即係你 哋公司有冇啲 briefing 去講解一下,即係例如話畀金日或者佢哋嘅 工人去聽話「邊幾隻物料我哋要用嘅,你要確保呢啲物料係你哋用嘅 物料。」有冇呢啲咁嘅 briefing,你知唔知?
 - 答:如果係講物料邊--因為佢哋提交嘅,我哋話畀佢聽--即係其實一定有 通知,如果唔係,佢哋都唔會 order 啲材料,照我所知,就即係同啲 工人講話邊幾隻材料係批咗,就應該方。
- 問:應該冇,好,唔該。好喇,我而家就想同你睇一睇你所講嗰個物料個 監控,即係物料嗰個管理、監控嗰樣嘢。你喺你嘅證人口供,如果我 哋睇番有關榮昌邨嘅證人口供,就係第 325 頁開始,就我哋係講緊個 material control 呢一個 heading 下面所講,由第 39 段一路就 去到 44 段嗰度,你有講到話個 material control 係點樣,即係 我會就住你呢幾段有幾個問題都同你釐清一下嘅。
- 答:好。
- 問:第一,你喺 39 段嗰度就講出咗你都知道有一個即係房署或者房委會 佢哋所制定嘅一個 form 6210,呢個我哋都睇過好多次,如果呢個 form 6210 喺你嗰個證人口供嗰度嘅附件,我哋睇到 465 你都列咗 出嚟嘅,你所講就係話呢個 6210 就係需要做啲 document check 同埋 material check 嘅,就就住 6210 呢三十幾個即係物件係需 要做呢樣嘢嘅,由於嗰個--即係你都講出,就係嗰啲 copper pipes and fittings, 喺你 39 段後面嗰度,同埋 soldering material 就唔係呢一啲咁嘅 6210 三十幾樣嘢入面嘅其中一樣,所以你就話

"these materials would not be subject to the above checking procedure.",就唔會有任何 material check 或者 係 document check,即係就住 soldering material 嘅話,係 咪呀?呢個係正確喇?

答:係。

問:我哋睇下你第 40 段所講嘅一啲補充嘅個解釋,你就話"In addition",即係話除此之外,你就話"in order to ensure the quality of the main contract works and as a requirement under specification preliminaries",你就話保華"had in place"一個叫做"project quality plan"嘅,就"for the project which had been submitted to the project architect for comment and received no adverse comments from him.",即係話你呢啲咁嘅 project 即係個 quality plan 都畀過房署睇,房署亦都冇乜即係不同意嘅地方,所以你都會採用 嘅,係咪呀?

答:係,對。

問:我咁樣講啱唔啱呢,如果就住 39 同埋 40 段嚟講,就話 39 段你就講 6210,40 段就係話除咗 6210 之外,即係話你哋保華唔係淨係跟 6210,你哋自己除咗 6210 之外,都會有一套自己制訂咗,而房署亦 都其實都通過咗嘅一啲嘅 project plan,就住啲物料嘅檢測或者就 住物料嘅 control,你哋都會係即係作呢啲制訂同埋會跟住佢嚟做 嘅,係咪呀?

答:啱。

問:跟住你就講到個 project quality plan 入面嘅唔同嘅部分,其中 有七點幾嗰啲,你有講到嘅,我都想同你去睇一睇呢個 project quality plan 一啲嘅細節嘅,有幾項嘅啫,如果我哋嚟睇一睇個 project quality plan,我哋睇下就住榮昌邨嗰個先,嗰個就似 乎就係比較詳細啲嘅,6.4,15126,15126下面 7.2 嗰度,請你望 一望,7.2,你就係喺你嘅證人口供剛才應該第 41 段度你都有提及過 呢個 7.2 嘅,就係講個 material control,呢度我就想帶你睇一 睇嘅。

7.2.1 嗰度係咁講嘅,就話"All materials shall be procured upon approval and delivered as per delivery schedule. Storekeeper is responsible for preliminary

 - 首先我想問一問你嘅,就係第一,你講嗰個 storekeeper 係咪 就係即係嗰個地盤入口嗰個管理人員呀?

答:唔係。

- 問:唔係,呢個 storekeeper 係講緊邊一位人士?
- 答:係我哋行內叫做收貨員。
- I 問:收貨員,佢通常喺個地盤駐場嗰度佢喺咩嘢位置?
 - 答:係會喺我哋主要擠貨嘅地方嘅附近。
 - 問:儲存貨嘅地方,係咪呀?

答:係。

問:我哋睇一睇你呢度有個 flowchart 嘅, 呢個 flowchart 就--因為 可能有啲箭嘴唔係好清楚, 不過我哋先由左睇到右先, 第一項, "PM to prepare Materials Submission/Delivery Schedule", 跟 住就去到"PM to obtain approval of materials as per the time frame in the Schedule", 跟住都係個 Project Manager 去 arrange with 個"Purchasing Dept to procure & deliver materials on time", 然後就去到個 storekeeper 嗰度, 個 storekeeper 就會"receive materials upon delivery", 跟 住就要考慮啲 material 係咪 accepted or not, 跟住就再去決定 點樣去到即係擺放嗰啲咁嘅物料嘅咁樣, 即係呢個就係喺你哋個 quality plan 入面所講嗰個物料 control。

- 答:因為呢個其實我哋都 review 過,即係查詢過,喺我哋 investigation,即係內部, internal 嘅 investigation,其 實就係我嘅前線同事執行呢個 flowchart 嘅時候,你哋係 control 係由我哋採購部購買嘅材料,因為喺第三個 blocks 嗰度就有"PM arrange with Purchasing Dept to procure & deliver material on time"。
 - 問:好,即係話你嘅意思就係話喺呢個 7.2 所講嘅 material control 就係由你哋公司直接去 procure,直接去採購嘅,先至會係 subject to 呢個 7.2 嘅啫,係咪咁講?
 - 答:係。
 - 問:我又想問下,如果一啲唔係你哋公司採購嘅,你哋嘅 plan 係點呢? 即係如果個 material 進場,你哋個即係內部嗰個指引應該係點樣做 法㗎?
 - 答:就就呢個--其實都唔係太多材料係由公司咩嘢嘅--公司購買嘅,但係 就呢個鉛水事件呢件事嚟講,就講番喉同埋焊錫料就係由水喉分包商 嚟買,佢嗰度嗰兩個材料我哋係方去 check 嘅。
 - 問: 冇 check 嘅, 係咪呀?
 - 答:冇 check。
 - 問:你剛才係講話呢個就住水喉分判商佢哋攞嚟,即係佢哋連工包料嗰啲 咁嘅材料,你哋就冇 check,係咪呀?
 - 答:係,不過只係就銅喉嗰啲,因為做完晒之後都會有嗰啲 marking,嗰 啲 BSE 去睇嘅時候,佢都會 check 下嘅,即係會對--睇下嘅嗰啲就。
 - 問:我想問下,就係如果一般嚟講,嗰個外判商佢哋自己採購返嚟,即係 佢哋自己負責採購返嚟嘅物料同埋你哋自己採購返嚟嘅物料進場嘅 時候都應該係同一個程序嘅啫,都係要即係要如果你入場嘅時候,係 咪你哋都有一個即係既定嘅一個準則就或者一個程序,係佢哋要向你 哋點樣去匯報先可以進場?
 - 答:因為通常啲材料,喺建築地盤嘅材料通常多嗰啲,佢哋係要預早一日 前通知我哋地盤嘅 general foreman 總管,係去安排畀地方佢擠 嘅,所以我哋考慮嗰啲材料係咪 premature,係咪太早嚟,如果唔 係嘅,就我哋會有一張入閘紙,佢要填報咗之後,我哋就畀佢--即係

Е 答:睇下--我唔可以完全係咁講,就譬如喉料就多數會有嘅,一定有,但 係小五金嗰啲因為係一個好少嘅數,嗰啲材料就我亦問過,我相信係 F 冇。 G 問:即係如果你嘅認知嚟講,就係話你哋公司對於小五金,假設我而家將 焊料包括喺小五金以内,你哋就唔會 check 嘅, 係咪呀? Н 答:係。 Ι 問:文件亦都唔會 check, 實物亦都唔會 check, 係咪咁樣? J 答:其實就因為你會睇番喺東匯邨嘅 statement 嗰度,就我哋係有入一 啲--即係譬如房屋署要求個 delivery note 就係關於一啲水喉嘅部 K 件或者一啲配件咁,我哋係會入畀--我哋會問番金日攞呢啲 delivery note 就係呈交畀房屋署,但係喺榮昌邨,就 clerk of L works 係有--即係房屋署係有要求呢個呈交,我哋就有問佢攞到呢 啲... - 問:有關人員嘅責任同埋工作範圍,或者我哋可以睇下1.1先,1.1 嗰度 個目的就係「地盤內所有受控物料必須符合以下條件」,呢度都講咗 話確保佢哋要接收、發出物料嘅紀錄、齊全等等嘅,1.3 嗰度就係講 話啲相關嘅職員嗰啲責任個範圍喺邊度,我哋睇下(a) 嗰度,佢係咁 講嘅,就話「於工程進行期間產生的所有關於物料的文件,包括接收 及發出物料的紀錄等文件,物料管理員」同埋呢個「管倉員」或者「收 貨先生」,即係呢個就係咪你剛才所講嘅 storekeeper 應該,係咪 呀?
 - 答: 係, 冇錯。
 - 問: 佢就「必須要儲存、管理登記冊、紀錄監控,確保文件齊全」嘅呢樣 嘢,似乎如果我有理解錯,我就住1.3 咁嚟睇,就有話特別係分啲即 係邊一類型嘅物料嘅,...
 - 答:唔係。
 - 問: ... 就 似 乎 係 所 有 物 料 , 即 係 你 哋 都 係 要 即 係 透 過 呢 一 個 storekeeper, 佢要去負責儲存咁樣嘅?
- 答: 唔係, 呢個其實係我睇字面上面嘅背後意思係講我哋買咗啲材料,分 發畀--舉例, 我哋嘅 mixer 或者係嗰啲坐廁--座廁嗰啲, 我哋係買 咗返嚟之後, 我哋要分發畀金日去安裝嘅時候, 我所以有發出物料嗰 個文件, 我哋係要做好紀錄, 同埋係 keep --其實呢個紀錄, 我哋亦 有喺呈交畀房屋署嘅文--即係我哋--孻屘房屋署係要求我哋入一啲 --搵番啲紀錄畀佢哋, 呈交一個 folder 畀佢嘅, 其中裏面喺榮昌, 我哋都有呢啲紀錄嘅。
 - 問:我想問下你, % 呢一個即係文件, 你剛才就話唔係嘅, 唔係講緊所有 物料嘅, 淨係講緊你哋採購嘅物料嘅?
 - 答: 呢個係指有一啲貴重嘅--即係要用嘅材料,而我哋採購返嚟,要發放 畀分判商去安裝嘅時候,咁要有個紀錄,所以就係會有發出物料嘅紀 錄同埋等文件。
- 問:停一停先,你剛才話係呢度講係有貴重啲嘅物料,但係呢度冇講到係

問:我想問下你嘅,就係喺你呢一個物料呢個手冊--呢個地盤物料處理手 冊入面,有一度係講-- 15218,B6.4,15218 嗰度就係我哋睇番, 即係你有好詳細睇過呢份嘢,不過我都可以再帶你睇一睇呢一度,...

料畀你, 呢度係咁講, 另外你 44 段都係講話就住呢啲焊料, 以你嘅

經驗嚟講,同埋喺呢個成個建築業,都唔係話一啲好特別需要去到檢 視嘅物料嚟嘅,所以即係基本上你剛才都講話冇做到檢測,係咪呀?

- 答:哦,好。
- 問:...就係 3.2.5,就住呢一個物料處理手冊,係特別係就住小五金, 其實都有啲制定嘅,如果我睇下 3.2.5,就直情係講緊小五金,我哋 講緊「注意 DN 內容」,DN 應該係個 delivery note,係咪呀?

答:唔。

問:咁就「如不懂英文者」,就要通知 PM,即係個 project manager 或者係個 assistant project manager,就派人係去協助嘅,當 收貨員接到通知,知悉所有物料到達地盤時,係需要通知 PM 等等, 以便安排存放的位置,跟住就聯絡運輸公司或者供應商相約到地盤睇 位等等嘅。(d)就係話要搬運工人分類放好,以便點數,否則可以拒 絕收貨等,即係要好嚴謹嘅一啲規定,跟住直情係(d)嗰度就係講話 要點嗰個貨物嘅數目,點嗰個數目同埋牌子、貨號,核對無誤之後, 則須喺個 delivery note 嗰度上蓋上「先收後檢」嘅蓋章同埋簽收, 然後話入咗倉嘅時候,如果有啲乜嘢破損等等,就要通知職員處理等 等嘅。

> 即係似乎呢個同你嗰個證人口供度嘅講法,就住小五金,因為你 話小五金就淨係一啲即係高層次嘅 supervision,就同你呢個你哋 公司自己制訂嘅手冊入面對小五金呢方面嗰個處理個方法似乎係有 啲出入嘅?

答: 唔係,因為我喺我證人口供講嘅小五金係 for the plumbing works,而呢個小五金因為實際喺建築地盤裏面,我哋自己本身都有 好多小五金要用嘅,舉例係照明系統,就掃把、手套嗰啲我哋都叫佢 做雜項小五金嘅,譬如有啲即係大偈用嘅螺絲,呢啲就由我哋自己買 嘅,我哋就要監管好,因為我哋其實呢個主要監管係因為會個 wastage好大嘅。

- 問:點解又作一個分別呢,如果你就住小五金嘅話,自己採購嗰啲,你自 己直情係有參與成個採購過程嗰啲,要需要啲咁嚴謹嘅程序嚟到核實 係啲貨對唔對,要睇番啲 delivery note 等等,但係人哋攞嚟,反 而人哋話同你買嗰啲,你就完全係唔跟呢一個手冊去做,點解會有咁 嘅決定?
- 答:其實點解有小五金 for plumbing work,即係我哋分判--即係其 實行內大部分都係咁樣做,點解呢?就係因為水喉,你要有好多螺 絲,其實我哋係唔知道佢用幾多,亦唔知道會係要幾多先足夠,所以 我哋就唔會去買,就分判咗畀佢,佢就去買佢自己需要嘅嘢係畀個--按足佢--呢個小五金其實係好多時都係愛嚟畀 support 佢去安裝佢 嘅工作,佢完成佢嘅工作嘅,而我哋呢啲--而另外呢啲小五金就係 for site 嘅 safety, for site 嘅 operation,係兩件事嚟,呢 個係,所以其實每一個喺地盤每一個 trade 都可能佢有佢自己嘅小五 金。
 - 問:即係你而家嘅意思就係話如果係講緊水喉外判入面即係所牽涉到嘅小 五金,你哋就覺得就唔需要作一個檢測?
 - 答:因為係只有佢先--即係佢先認知到呢啲材料係咩嘢,其實即係可以咁 講--坦白啲咁講,一個小五金如果係 for 水喉匠嘅,佢送嚟畀個 list,我哋未必識睇。
 - 問:但係你哋係例如就住啲物料嚟講,如果我哋係講緊焊料嘅,你哋都即 係費一啲周章就係話做咗一啲呈交物料樣辦嘅工作畀房署,房署批核 咗,即係你都係覺得有咁嘅需要去做呢個步驟,但係你去到話呈交, 即係大批物料嚟到嘅時候,就你哋覺得唔需要,即係你哋公司就冇呢 個責任再需要做檢測?
- 答:其實唔係話我哋有責呢個問題,而係因為喺行內,我哋一路以嚟都係 認為焊料呢件事係--即係尤其是喺我做咗建築--喺香港嘅 building contract 裏面,係做咗三十年,其實係有會去 check 呢個焊料,因為焊料,我哋都一路以為只係得一種,我哋唔會覺得原 來有幾多種,又話--即係而家知道,即係話又有含鉛、非含鉛咁,但 係我哋一路都以為係水喉匠會用一隻啱嘅材料,因為佢最後要經過水 辦嘅測試。
- 問:我又想問下,就係剛才我哋睇呢一個手冊,就如果我哋睇就住其他嘅 即係工程嘅小五金,呢度就直情係即係你需要睇到嗰啲 delivery note嘅,即係好清楚要睇到 delivery note,係咪呀?

以問佢㗎嘛。 答:佢未必會答我,我相信。 問: 喺呢個東匯邨, 東匯邨當時就似乎係有--即係 Golden Day 係有畀 過你任何 delivery note 嘅, 係咪呀? 答: 係, Golden Day 話畀我哋聽就係佢係用電話落 order 嘅, 佢冇 keep 任何紀錄。 問:你就相信佢呢個講法?即係你相信即係一個地盤有咁多焊料嚟過嘅, 都一張單據都有,你信佢呢個講法? 答:但係其實都唔--因為嗰個事情個工--喺發生事情係同個工程都距離咗 幾年嘅。 問:呢個同距離遠晤遠唔係有關係,我而家講緊就係話你問咗金日有關東 匯邨「有冇單呀?」咁,佢同你講就話「冇喎,即係呢啲電話口講嘅 咋喎。」但係榮昌佢又畀到四張嘢你喎,但係你唔會追問佢「咁東匯 · 個度點架?有冇架?點解話冇嘅?你一條邨有,一條邨又冇呢?」 咁? 答:其實係我哋都--其實佢講,我哋一定要信嘅,因為佢係冇就--佢話冇 就有,第二件事,所以我哋都要求佢係 black and white 寫番個 memo 出過嚟畀我哋,而我哋係將呢個事情係有匯報畀房屋署聽。 問:最後我想問一問你,就住你哋同嗰個持牌水喉匠,持牌水喉匠因為我 呦知道喺呢個 case 係張達欽先生, 佢亦都係即係 Golden Day 個老 間。 答:Owner。 問:就住例如持牌水喉匠佢喺成個地盤嗰個建築過程,例如佢嚟過幾多 次、做過啲乜嘢嘢呀咁,你哋有冇紀錄?

Α 食水含鉛超標調查委員會 2016年1月4日 Α B B 答:係。 С С 問:即係而家我哋講緊係細口徑嘅喉,你話大口徑嘅就銀焊。 D D 答:係。 Е Е 問:我想你睇一睇 581 頁嗰度就係講"PIPES, FITTINGS AND JOINTS" 嘅,你見到嘛? F F 答:係。 G G 問: 呢個 PLU, 咁你揭一頁, 582 頁嗰度有個 PLU1.M130.5。 Н Н 答: 見到。 Ι Ι 問: "COPPER PIPE FITTINGS"嘅。 J J 答:係。 Κ K 問:第1段就話所有嘅 fittings、joints 嗰啲嘢就要符合 BS EN 1254, 你見到喇? L L 答:係。 Μ Μ 問:數落去第5項,我想你睇一睇,佢呢度話"Use compression type fittings for pipe sizes less than or equal to 54 mm Ν Ν or use solder (end feed or integral) capillary fittings for pipe sizes less than or equal to 108 mm, or use 0 0 brazed capillary fittings for pipe sizes less than or equal to 159 mm",即係換句話講,可以概括嚟講,嗰度其實講 Р Р 緊三種口徑嘅,有啲細口徑、中口徑同埋大口徑嘅銅喉。 0 Q 佢基本上就話,第一, compression type fittings 可以用 喺細口徑嘅銅喉度嘅,而中口徑嘅其實係可以用三種--即係細口徑或 R 者中口徑嘅喉又可以畀你揀用 compression type,又可以用 R

者中口徑嘅喉乂可以畀你揀用 compression type,乂可以用 capillary fitting、solder capillary fittings,而大口 徑、細口徑、中口徑都好,都可以用 silver brazing 嘅,呢度係 咁講嘅,你同唔同意?

問:我好明白到你唔係一個水喉匠,所以你唔知嘅,你可以答唔知嘅,因 為我嘅指示就係話其實你今朝畀個答案話銀焊同埋錫焊個價錢嗰度 個分別,你今朝,如果我冇聽錯,就話一棟樓係相差五十萬喥嘅?

答:係。

- 問:我嘅指示,就係話嗰個價錢只係講咗嗰個焊料上嘅價錢嘅分別,因為 如果用銀焊個方式,嗰啲細口徑嘅銅喉係要用一啲厚身啲嘅銅喉至做 到嘅,你知唔知道呢樣嘢?
- 答:因為我係查詢,我對住委員會都講咗嘅,我係向啲水喉匠查詢,我話 我個查詢係咁嘅,就係話如果--因為當時房委會都問我哋有咩嘢可以 改善嘅方向,我就問佢如果係銅喉--因為我哋都問過一啲水喉匠,佢 話用銅喉就唔會產生呢個鉛嘅問題,而我就問佢「如果係,貴咗幾多 呢?」佢就話如果你一早--因為當時我哋都有落緊房屋署嘅標嘅,佢 話「如果其實每一座,我個報價就係貴五十萬一座。」而佢講--我相 信佢講係連工包料。即係不過呢個只係 for...

主席:即係包埋銅喉?

- 答:唔係,即係用唔用厚身嘅銅喉,佢冇講,佢只係講話「嗰座 building 會係貴咗五十萬。」但係就係咁--嗰個答案就係咁樣。
- 殷先生:或者我哋冇必要同呢位證人爭議呢一點,因為佢都係問番嚟。我 嘅指示就係話計埋銅喉嘅--厚身啲銅喉嘅價錢就唔止五十萬嘅。

主席:哦,唔止五十萬添,哦,唔緊要喇,即係多過五十萬。

- 問:你同唔同意我咁講,其實從一個建築嘅項目地盤上個運作個管理嚟講 個層面,承建商係最重要嘅一個人,總承建商?
- 答:睇下你點睇--角度點睇,因為其實每一個--成個團隊,包括則師、工 程師、承建商、分包商、工人,都扮演緊佢嘅角色,我咁睇。
- 問:但係有兩個位置係總承建商話晒事嘅,一個就係佢點去履行嗰個主合約入面嘅規條,另外一個就係睇個場,即係嗰個業主將個場交咗畀--地盤交咗畀你,就係你睇個場㗎喇,就算業主自己入嚟--帶啲入嚟--除非佢炒咗你,一日未炒你嘅,係總承建商話晒事,邊個入得嚟,乜 嘢物--燃料入得嚟、唔入得嚟,我咁講,你同唔同意?
- 答:某程度上同意,某程度上唔同意,因為其實我哋都要喺--如果即係你 舉嘅例話邊個人帶料入嚟,即係或者要喺地盤做一啲嘢,其實我哋都 要向業主--得到佢嘅同意,即係唔係話總承建商話「你喺地盤做乜都 得。」唔得。
- 問: 啱,但係我想同你探討嘅就係關於管理呢個分判商嘅問題上,因為當 然總承建商理論上可以所有嘢都係用自己嘅僱員去做嘅。
- 答:係。
- M 問:唔需要分判出去嘅?
 - 答:實際唔得。
 - 問:實際唔得,但係如果佢分判咗出去嘅時候,佢唔係話「我張主合約有 關嗰個分判商嘅範疇嘅嘢寫晒落去個分判合約度,話佢照做,總承建 商就話了結咗佢嘅責任。」唔係咁樣㗎嘛?
 - 答:我有講過。
 - 問:而其實如果有分判嘅情況之下,總承建商係有兩個環節係責無旁貸 嘅,一個就係對呢個分判商嘅工作,即係包括如果佢連工包料嘅話, 佢嘅手工以及佢供稱嘅物料,作出適當嘅監控,呢個係總承建商唔可 以唔做嘅嘢嚟嘅?
 - 答:同意。
 - 問:另外作為監控分判商嘅提供嘅物料嘅質量嗰方面,亦都係配合番你管 理個地盤個物料進出嗰度係構成嘅,即係我想講嘅,就係話如果你睇 緊啲分判商啲乜嘢嘅物料入嚟地盤,你就會睇埋究竟間接上佢會唔會

問: 佢講畀我聽 AQCC 要做啲乜嘢, 去到 d 項嗰度, 佢就話 "Checks and endorses the following items and QCM shall further inspect and endorse the forms and documents relevant items (i) and (ii) below.",其餘講到羅馬數目字第 iv 項, 即係 AQCC 要 check 嘅嘢就包括"Material delivered on Site against Approved samples",跟住第 vii 項就係"Delivery

- 問:講一講係咪即係從個邏輯嚟講,你自己直接採購嘅話,買錯嘅機會應 該細啲,啱唔啱?
 - 答:(沒有可聽到的回答)
 - 問:你隔一重,叫人哋--使人哋去買嘅,出錯嘅機會理論上大啲,啱唔啱?
- 答:咁我又--即係如果即係好坦白講,而家大家都係事後孔明,但係因為 嗰個水喉其實係一個幾專業嘅行業,佢係要有持牌--個水喉匠係持牌 嘅,要有牌先做得嘅,我哋亦不嬲都深信一個持牌嘅水喉匠唔會攞自 己個牌嚟--即係講得俗啲,係搞笑嘅,我哋都深信佢買嘅材料係適合 for 水務局嘅要求,最後,佢亦要 pass 水務局個 inspection 同埋 個水樣辦嘅測試,所以呢樣嘢對我哋嚟講,我哋反為係覺得有信心。
- 問:個流程中,未必係單一個人或者一個單位有責任,你倚賴咗嗰個持牌 水喉匠去履行佢自己嘅責任,事實上我哋接受係咁樣發生嘅,但係我 想同你探討一樣嘢,就係你而家睇過嗰個 project quality plan, 佢冇講話 AQCC 要到場要睇嗰啲--驗嗰啲--核對嗰啲物料,而家我講 驗,唔係話拎去化驗室嗰啲驗,核對佢對唔對辦、啱唔啱 spec.,佢 冇話淨係你自己總承建商直接購入嗰啲物料就要咁做,經分判商或者 持牌水喉匠睇嘅嘢就唔使做㗎喎。
 - 答:因為其實又相附--兩個嘅,因為除咗呢個,個 quality plan 其實 即係我哋制訂呢個 quality plan 嘅時候,係 according to 個 specification 要求同埋個 contract 嘅 requirement 嘅,其實 最大嘅有一個問題存在,就係因為有一張 form,難聽啲就係 6210, 佢係令到我哋係覺得嗰啲材料就係測試嘅材--就要檢查嘅材料,呢個 係喺當時嚟講,係困難嘅,因為其實包括 clerk of works 喺地盤 都係要求我哋 check 咗呢啲嘢,就 submit 呢啲 record 畀佢。

J J 答:唔係,我唔係喺呢度--其實我唔係喺度就淨係希望話 discharge 我 呦所有嘅即係 liability,即係我唔係喺呢度咁樣嘅方向,但係當 K K 時真係大家係有一個認知去切實去監管一個小五金去燒焊嘅--即係 一個燒焊嘅物料,而當時大家包括房屋署、我哋成個團隊--成個 L L project 嘅團隊都有呢個認知去做呢樣嘢。 Μ М 問:如果我咁講,你同唔同意我講呢,就話事發當日,即係7月之前,好 多人,包括總承建商,你可能話房委會或者其他人都係,業界、行內, Ν Ν 可能對焊料會出事呢樣嘢警覺性較為低, 呢樣大家唔爭議嘅, 但係你 同唔同意我講,如果睇嗰個承建商喺管理嗰個建築項目嗰個角色嗰個 0 角度去睇,其實你哋係有責任而家睇番整體,尤其是個 project 0 quality plan,你哋係有責任,嗰啲不論係分判商買咗帶入場嘅嘢, Р 抑或係你哋自己買嘅嘢,你都有責任去確保嗰啲物料--進場嘅物料係 Р 符合合同嘅要求嘅? Q Q 答:其實我可以咁樣--即係我唔係喺度想 argue,但係其實個問題存在, 就係我想講一講嘅,就係我哋到今日都唔知道究竟係有冇嗰啲 R R approve 嘅材料到咗地盤,即係如果係到咗地盤,佢係冇被採用,用 咗第二隻嘅,咁係另一個 story,即係而家大家都係未清楚嘅, 呢個 S S 事情。 Т Т 主席:唔係,我聽唔係好清楚你個答案,你對住個咪講,好唔好呀? U U

Е F 問:我姓殷嘅。 G 答:...律師問我個問題就係話我哋究竟--如果我哋能夠防止咗嗰個唔合 格嘅材料入地盤,就唔會發生呢件事情,但係其實我想講嘅,就係我 Н 哋到今時今日都未知道究竟係合資格嘅材料有冇到地盤,如果佢到 咗,只像有人用一啲唔合格嘅材料用咗上去,咁就像另一個故事,我 Ι 想講就係咁。 問:我其實頭先個問就係話你接唔接納係其實總承建商有個責任確保送入 J 地盤嘅物料,不論係由分判商自行購買帶進場嘅嘢抑或你自己總承建 商直接購買嘅嘢,你係有責任去確保進場嘅物料係符合合約嘅條件嘅 Κ K 要求。

- 答:所以我個答案就係話我哋係有去要求,有去監管,有合約上嘅要求要 佢用啱嘅材料,而佢--而講呢件事情喇,佢究竟係--可能佢真係送咗 合資格嘅材料嚟,正如頭先我個答案,不過只係有人用咗唔合資格材 料落去啫。
 - 問:梁生,個問題好簡單,我哋知道你喺嗰個分判商個合約度有要求指定 **佢要用適當嘅物料, 呢個**有爭議, 但除咗喺嗰個分判合約入面個內容 寫咗之外,你對地盤管理個環節嗰度有冇責任控制進場嘅物料令到入 得嚟地盤嘅用料就係合乎合約嘅要求?
- 答:我哋有呢個責任嘅。
- 問:我仲有一個問題想問你嘅啫,一個環節,就係你頭先都講過話銅喉我 她知道事實上,雖然你而家接納你有責任物料進場嗰陣時你應該 check — check, 銅喉呢, 你就話「唔緊要, 遲啲做好咗嘅時候, 我 都會做 PASS 嘅時候睇嘅。」你頭先咁答我,咁帶起到 PASS 嗰個位, 你同唔同意我咁講,其實 PASS 嘅本質係要考核下嗰個承建商嘅能 力,測試你哋嘅做承建商嘅能力,就唔係去替代你哋去覆核究竟你喺 一個項目入面有冇履行到合約嘅責任呢?

| 你呢一度,我頭先讀畀你聽嗰兩句嘅第二句唔係,第一句你就 話嗰個 licensed plumber 就叫 Paul Y 唔需要參與水務署嗰個 | 0 |
| inspection。第二句,你就話根據呢個持牌水喉匠,嗰個水務署嘅 inspector 就唔需要 main contractor 嘅參與,即係唔需要 Paul | Р |
| Y 嘅參與。我想請問你呢度講嘅持牌水喉匠係邊一位持牌水喉匠?同 | Q |

| D | 主席:事無大小,你哋都可以搵佢㗎喇? | D |
| E | 答:係。 | E |
| F | 主席:得,好。得,繼續。 | F |
| G | 問:梁生,根據你頭先所講,就你自己本人同翁生接洽嘅,即係關於呢一 | G |
| Н | 個 inspection 呢一個水務署嘅 inspection 呢件事? | Н |
| I | 答:其實係喺我記憶喇,因為都係幾年前嘅事,就係將近完工嘅時候,我 哋係有一個會議,就搵咗翁生嚟,就問一問佢「而家要入 WWO46 part IV㗎喇,我哋啲 builder's works 有咩嘢會阻住你,會影響到水 | I |
| J | 務局嘅 inspection 呢?」咁樣, 喺期間, 喺嗰個會議上面, 我哋都 提出話「當你約到嘅時候, 我哋都想去一齊去參與呢個睇即係水務局 | J |
| K | 嘅 inspection」。 | K |
| L | 問:梁生,你嘅意思係當時你本人有參與呢個會議? | L |
| М | 答:有。 | М |
| N | 問:呢個會議有冇紀錄? | N |
| 0 | 答:冇。 | 0 |
| P | 問:如果我而家我話畀你聽如果我而家向你指出,就係話呢一個水務 署嘅 inspection,其實如果冇 main contractor 或者冇 Paul Y 嘅配合或者係參與,其實係做唔成嘅,因為譬如話因為個地盤都係屬 | P |
| Q | 於呢個 main contractor 控制嘅,譬如話要 access 某一啲地方亦 都需要 main contractor 嘅配合,就算連開堼咁簡單嘅動作,其實 | Q |
| R | 如果冇 main contractor 嘅參與係做唔到嘅,你同唔同意我嘅講 法? | R |
| S | 答:所以我哋就有嗰個會議問 builder's work 有咩嘢要配合、有咩嘢 安排,不過我頭先講嘅 participation 喺呢個 inspection 條講 | S |
| Т | 我哋跟住水務幫辦一齊行、一齊睇,呢個係同我哋安排 access、安 排��嘅運作去配合係兩件事嚟。 | Т |
| U | 問:但係如果你唔係一齊都有去睇嘅話,咁你點樣安排到呢啲 access 呢? | U |

A

| В | | B |
|--------|---|--------|
| С | 答:嗰個安排 | С |
| D | | D |
| _ | 主席:呢啲唔使講,係咪呀?呢啲使唔使畫公仔畫出腸呀? | |
| E F | 答:主席,我嘅意思其實就係話佢呢一度所講呢一個 main contractor 冇 | E F |
| G | 主席:個 physical inspection,巡每一層樓嘅時候,呢度冇吖嘛, 當然我要畀你入地盤,嗰啲梗係要喇,係咪?啱唔啱?如果我唔畀個 | G |
| н | 證你,你連地盤都冇得入喇,話知你水務幫辦喇。 | Н |
| I | 胡先生:係喇,但係如果佢要每一層樓去嘅時候,揸啦嗰個其實都要係 main contractor 去做。 | I |
| J | 主席:兩件事嚟嘅呢啲, 係咪呀?你即係 | J |
| K | 胡先生:即係我淨係想指出,就係話佢 | K |
| L | 主席:大題目我畀你問冇問題,不過呢啲咁樣樣咁細眉細眼嗰啲問落去都 冇意思喇, 係咪呀? | L |
| Μ | 胡先生:Okay,明白嘅。我只係想指出佢其實係有參與咁解嘅啫。 | М |
| Ν | 主席:參與嘅程度係去到邊度,不如你問,係咪? | N |
| 0 | 胡先生:係。 | 0 |
| Р | 主席:就唔係有冇參與,參與嘅程度,佢而家就係講緊實際嘅巡查,參與 程度佢哋就冇份,當然要配合佢哋入嚟巡查,咁佢梗係有份喇。 | Р |
| Q | 胡先生:Okay,或者我問我第二個問題。 | Q |
| R | | R |
| S | 問:我第二個問題就係話都係喺你嘅證人證詞入面第 93 段,其實呢一段 喺頭先剛才嘅 cross-examination 嗰度即係都有 touch on 過, | S |
| Т | 入面就有講就係話有一啲其實佢個原本嗰個概念就係喺第 90 段嗰 度出現嘅,就係話喺個 schedule 1 入面有幾個 item,item (3)、 (4)同埋(6),okay,就係嗰啲 mixers 嚟嘅,就係後來就係轉咗, | Т |

alternative 嘅 mixers 就係 submitted to and approval by the Housing Authority, 喺第 93 段, 你就話"the main contractor is not privy to the communications between the Water Authority and the Licensed Plumber. It was only after this 'lead water' incident that I became aware that the Licensed Plumber did not inform the Water Authority of the corresponding amendment to the Annex to Form WWO46." 你呢度就話個持牌水喉匠就有同水務署講過或者溝通過關於轉咗 **呢啲**龍頭嘅,其實你哋有冇通知過個持牌水喉匠其實呢啲龍頭係轉 咗? 答:即係因為個持牌水喉匠係佢負責去安呢啲龍頭嘅,我哋係分發--由我 **呦買**,分發畀佢去安裝嘅,佢係完全知道--好肯定佢完全知道呢個龍 頭係轉咗牌子。 主席: 呢個 mixers 係你哋自己買嘅? 答: 係, 有錯。 問:但係因為呢個 mixers 係你哋... 胡先生:Mr Chairman,你講得好啱。 問:因為呢個 mixer 係你哋自己買,但係即係話你哋轉咗呢個 mixer 嘅 時候,其實你有方通知過個持牌水喉匠其實係換咗一個㗎喎? 答:因為其實個故事又講番轉頭,就係喺 sample submission -- 唔係, 喺個 sample floor 做嘅時候,點解會要換呢三個 mixer 呢?其實 我當時都有參與嘅,就係因為則師就發覺原本我哋即係入咗水務局嗰 個批嗰個,即係嗰個開關掣係太近埲牆,會刮到手,即係安嘅時候, 開嘅時候,會傷到手,所以則師就話要換過一啲 model 係令到唔會咁 - 111 -

| D | | "All works items under this contract must include | 1 | D |
| E | | workmanship and materials, including machinery and | | Е |
| F | | tools, unless otherwise specified." | | |
| F | | So this refers to the plumbing works in the | | F |

| F | A. | There is a preamble in the QS, and it will state wha | t is | F |

| F | Q. | Let's take the soldering materials, for instance. W | le | F |

| С | | to submit samples for all these components, like the | C |
| _ | | soldering materials? Did they ever instruct you or | |
| D | | request you to submit samples to them for approval? | D |
| E | A. | Let me put it this way. After the incident, we did | go E |
| Б | | back on the record. For Wing Cheong Estate, the sam | - |
| F | | submission scheduled, the first version did include | the F |
| G | | submission of soldering materials. After submission | , we G |
| Н | | would do the updating. We updated the schedule and | |
| п | | included the material. So it is hard for me to say | Н |
| Ι | | whether it was the Housing Department or it was | I |
| J | | Golden Day, or whether it was Paul Y who did it. | J |
| J | Q. | So you did the audit trail search, but you are not | J |
| К | | certain who initiated this? | K |
| L | A. | Right. On record, Paul Y, in the first sample | L |
| | | submission schedule, it didn't include the soldering | |
| М | | materials. The schedule was put together by Paul Y. | So |
| Ν | | my understanding is that Paul Y wasn't the one to | Ν |
| 0 | | initiate it. | |
| 0 | Q. | Let's refer to schedule 1 in your statement. G1, | 0 |
| Р | | page 348. Let's take a number of them you don't | have P |
| Q | | to go through them one by one on this page, (1) a | nd Q |
| x | | (2), the ductile iron pipe and fittings, they belong | |
| R | | under PLU1 materials. Number (2), also under PLU1, | the R |
| S | | brazing rod jointing copper pipes fall under PLU1. | S |

| D | A. | We did conduct a review during the internal | | D |

| J | A. | Yes. | | J |
| K | Q. | What about materials not procured by your company, w | hen | K |

| Μ | A. | Well, there are not that many materials that are not | | Μ |

| D | Q. Generally speaking, the subcontractors would purchase | D |
| - | their own materials, copper pipes and so on, and you | D |
| Ε | would also procure your own materials. When they are | Ε |
| F | delivered on site, they would be subject to the same | F |
| | procedures. Would there be the same procedures that | |
| G | apply to all these materials before they would be | G |
| н | allowed in? | Н |
| | A. For construction site materials, they would have to give | |
| Ι | us prior notice one day in advance before delivery, | Ι |
| J | because we have to arrange a spot for them to be stored, | J |
| | so we would consider whether materials are coming | _ |
| K | prematurely. They have to fill in an access form for | K |

| | Q. As regards the access form, you may have materials | |
| Μ | procured by you and the subcontractors. Would they be | Μ |
| Ν | subject to the same access form? | Ν |
| 0 | A. You can't really put it this way. For pipes, yes, but | |
| 0 | for minor hardware items or the filler metals, the minor | 0 |

| 0 | Q. So, as far as you know, for the filler metals, let's say | 0 |

| S | A. Yes. No, we don't normally check them. | S |

| н | | your company itself formulated. | | Н |
| | Α. | No. In my witness statement, I was only talking abo | ut | |
| Ι | | minor items for plumbing works, but in this site man | ual, | Ι |
| J | | we are talking about other minor hardware items, for | the | J |

| С | | many would be enough. That's why we won't purchase | С | 1 |

| Ε | | the minor hardware items are supporting items for the | e E | |
| Б | | subcontractor to finish his work, and other minor | | |
| F | | hardware items are for site safety and other purposes | s. F | |
| G | | So they are two different matters. In every site, th | nere G | ŕ |

| Н | Q. | So what you are saying is, if we are talking about | Н | |
| Ι | | plumbing works and the minor hardware items for plum | bing I | |

| U | Α. | It is because only the subcontractor himself would k | | |
| К | | what those materials are, and I can be very frank wi | th K | |
| L | | you. If minor hardware items are for the plumber, we | e L | J |
| | | may not be able to check them because we don't know | | |
| Μ | | much about them. | Μ | I |
| Ν | Q. | But talking about materials, if you are talking abou | t N | [|
| 0 | | materials, you would submit the samples to the HD for | | |

- Cindustry for 30 years -- we never checked the soldering
material, because we always thought that there was onlyDone soldering material. We didn't know there were soEmany. Now we know there are leaded and lead-free
categories, but we always thought that the plumber wouldFuse the correct materials, because in the end there hasGto be a water sample test.
- Q. Just now we looked at the manual. With regard to minor
 hardware items for the project, you said you would have
 I to check the delivery notes, right, to check for the
 volume, the quantities. And with regard to soldering
 material, and talking about the materials supplied by
 K the plumbing subcontractor, is it is your company's
 I decision that even the delivery notes for those will not
 be checked. In other words, you will not even require
 M the keeping of those records?
 - A. That's because the plumber never notified us about the delivery of soldering materials. We were not informed.
 - Q. With hindsight, you would know that you were not informed when the subcontractor delivered materials to the site. So what you mean is --
 - A. No, I am talking about large batches of materials. Say for example copper pipes, plastic pipes, they would.
 - Q. But do you check your access records, whether there are any records on the delivery of soldering materials?

| С | A. | Well, no. Soldering materials should not appear on | the | С |
| | | access records. | | |
| D | Q. | But have you checked? | | D |
| Ε | A. | No, I haven't. | | Е |
| | Q. | But we know you said they did not inform you, but yo | our | |
| F | | practice was such that you did not require them to g | ive | F |
| G | | you a copy of the purchase orders. You did not requ | ire | G |
| TT | | that? | | |
| Н | Α. | No, we didn't. | | Н |
| I | Q. | Why you made that decision, that is, you never asked | ł | Ι |
| J | | them to give you the purchase orders? | | J |
| - | A. | As I said in paragraph 44, this is not a significant | | U |
| K | | material with a high risk. That is what the industry | Y | К |
| L | | recognised. That is why we did not require it. | | L |
| | Q. | But then you also agreed with me just now that with | | |
| Μ | | regard to soldering materials, you had to provide | | Μ |
| Ν | | a sample for the HD for approval, and one of the rea | sons | Ν |
| 0 | | was that when large batches of materials were sent t | 0 | 0 |
| 0 | | the site, you could do the checking, but if you don' | t | 0 |
| Р | | even have the basic documents, there is no way you c | an | Р |
| Q | | do any checking or comparison. | | Q |
| | A. | Very often, according to experience, if we know that | • | C |
| R | | some materials might be problematic, we would do ver | У | R |
| S | | stringent checking and surveillance. But so far, in | the | S |

| E | | "Materials Receiving Daily Report". | | E |
| - | Α. | Yes. | | |
| F | Q. | Your staff should fill out such a form when material | S | F |
| G | | are received; right? Have you checked these reports | to | G |
| н | | try to locate soldering materials? | | |
| Н | Α. | This form is for receiving materials ordered by our | | Η |
| Ι | | purchasing department. If we had not ordered solder: | ing | Ι |
| J | | materials, they would not appear in these forms. | | J |
| J | Q. | So you are telling me that these forms would only ap | oply | J |
| K | | to materials purchased by your own company? | | K |
| L | A. | Correct, because these reports are to be transferred | l to | L |
| | | the purchasing department to pay for the materials | | |
| Μ | | ordered. | | Μ |
| Ν | Q. | Regarding this lead in water incident, in about Augu | ist, | Ν |
| 0 | | your company should have submitted a few investigati | ve | |

Would you agree with what I am going to say? At the D material time, that is before July, many people, including the main contractor, and even the HA and also Е within the industry, everybody would have a low F awareness of the soldering materials. We won't argue with that point. But would you agree with me when I say G that the main contractor has a role in supervising the Η entire project and from this angle, in fact you have the Ι responsibility, because in fact you have your project quality plan, so you have the responsibility over J materials bought by the subcontractor and taken to site Κ or materials purchased by yourselves; you still have the responsibility to make sure that the materials delivered L on site are in line with the contract? If they were D D delivered on site and others used non-complying materials, then it is a different story altogether. Е Е MR YIN: No. My question was, would you accept that the F F main contractor has the responsibility to ensure that materials delivered on site, whether they were purchased G G by the subcontractor and brought to the site, or whether Η Н they were purchased by the main contractor, that you Ι Ι would still have the responsibility to ensure that the materials delivered on site comply with the requirements J J of the contract? K Κ A. That is what I was saying. My answer was we did have contractual requirements, that the subcontractor should L L use complying materials. And talking about this Μ М particular incident, maybe they really delivered complying materials on site; as I said, it's just that Ν Ν somebody used non-complying materials. 0 0 Q. No. The question is very simple. We know that in the Р Р

| Е | | now you accept that you have the responsibility of | E |

| F | | pipes, you said it was all right. After the works we | ere F |
| G | | completed, you would apply the PASS test. That is wi | nat G |
| Н | | you said. Would you agree with what I am going to s | ay: H |
| n | | actually, PASS was there to appraise the ability of | |
| Ι | | contractor, that is, to test your ability as | Ι |
| J | | a contractor. It is not there to substitute your ro | le J |
| | | in checking whether the contractual responsibilities | |
| K | | discharged? | K |
| L | Α. | I disagree. We do the PASS test every month. In fa | ct, L |
| | | you do not have to put the ability of the contractor | |
| М | | the test every month. | М |
| Ν | Q. | If that is your understanding, what is the purpose of | of N |
| 0 | | PASS? | 0 |
| 0 | Α. | The HD said that they would like works to be conduct | |
| Р | | in the correct way, so it is a mechanism to help che | ck P |
| Q | | whether works are done correctly. A score is given | 50 Q |
| | | that people know where to improve. | - |
| R | | What I disagree is that the PASS is there to test | R |

| | Α. | Well, yes, but it is not a test as such. | |
| D | Q. | No, the score will determine whether you are still | D |
| Ε | | a good enough contractor for future contracts; is the | at E |
| F | | right? | _ |
| F | A. | Well, this is only one part of the tendering process | . F |
| G | Q. | No matter what, contractors cannot say that "I would | G |
| Н | | rely on the PASS assessment to check whether I have | Н |
| | | discharged my contractual responsibilities." | п |
| Ι | A. | Well, no. You can look at the PASS manual which is | I |
| J | | quite comprehensive. As I said during the tender | J |

| K | | works done by Golden Day using PASS. | K |
| L | Q. | Are you saying that you can ignore things not includ | ed L |
| | | in the PASS test? | |
| Μ | A. | I can talk about this on two levels. As I said in my | M Y |
| Ν | | witness statement, we would comply with all the | Ν |
| 0 | | contractual requirements and we would conduct tests. | |
| 0 | | But then there may be defects and we would follow up | on 0 |

| E | | 16, the heading, "Quality assurance system (ISO 9001), | Ε |
| F | | environment assurance system (ISO 14001) and PASS". | F |

| G | | and also the environment assurance system, and in | G |
| Н | | paragraph 46, that is the PASS. Can you see that? | Н |
| | Α. | Yes. | |
| Ι | Q. | So, quality assurance, in other words, you have done | Ι |
| J | | something whether the quality is good enough. That | J |
| 0 | | is separate from PASS? | U |
| K | Α. | Well, PASS is also based on the quality of the works, | K |
| L | | and a score is given. You can see, I think it should be | L |
| | | on page 381, in the tender interview agreement, under | |
| Μ | | 06, we would say we would accept the works according to | М |

| D | If you would come, please, to the last extra | D |
| Ε | document, which is annex B, and by estimation it's about | Е |
| T. | ten pages from the end. Do you see a letter from Paul Y | |
| F | dated 23 December 2015 to the contract manager, | F |
| G | section 4 of the Housing Authority? It's a letter from | G |
| н | Paul Y; do you see that? | Н |
| | A. Are you talking about appendix B? | 11 |
| Ι | Q. Annex B, the first document. | Ι |
| J | CHAIRMAN: Yes, okay. | J |
| | A. Sorry, I can't locate it. | |
| К | DR McCOY: It should be on the screen. Do you see that now? | К |
| L | A. (In English) Yes. | L |
| | Q. So it is dated 23 December 2015, and it's addressed to | |
| Μ | the contract manager, and it's signed by the project | Μ |
| Ν | director. And what Paul Y has done is to attach, for | Ν |
| 0 | comment and approval by the CM, a revised project | 0 |
| 0 | quality plan, incorporating the corresponding measures | 0 |
| Р | in response to the various additional inspection and | Р |
| Q | testing requirements. Do you see that, Mr Leung? | Q |
| | A. Yes. | · · |
| R | Q. If you turn just to the next page, please and I am | R |
| S | grateful to the Secretariat here we have the specific | S |

| F | A. Yes, I can see that. | F |
| G | Q. Lastly, please, if you come across to annex C, there are | G |
| п | extracts from the general obligations under the | |
| Η | contract. You have seen that; it's a familiar document? | Н |
| Ι | A. Yes, I can see that. | Ι |
| J | Q. The point that I am wishing to emphasise is that Paul Y, | J |
| Ū | once it received the variation obligation imposed by the | 9 |
| K | customer to introduce updated and enhanced obligations, | K |
| L | testing for lead and the wider water quality regime, | L |
